TEKO

TELMEK Consoles

Your Solution Partner in ATC

TELMEK was founded in 1994 in Ankara and manufactures sheet metal parts and products by using high technology. We serve to IT, electronics, automotive, railway and defence industries. Our Main products are ATC Consoles, Technical Furnitures, Rack Cabinets, Indoor and Outdoor Electrical Cabinets and Distribution Panels, as well as high variety of custom enclosures. The company is equipped with various high technology machinery such as laser cutting, punching, bending, automatic bending center, surface grinding, welding, riveting and other supporting machines and tooling. This enables us to produce high precision and high quality parts and supply to the leading global companies from various industry sectors.

As TELMEK Inc, we are manufacturing state of the art consoles for ATC Systems. On every step of design process, our R&D engineers are modelling the console focused on customer requests. Modelled designs are manufactured on CNC machines with the help of experienced operators and programmes.

With more than 20 years of experience, TELMEK has attended to the big projects all over the world.

TELMEK is and will be the solution partner to provide high quality consoles and rack cabinets for the air traffic control market.

- POWER DISTRIBUTION UNITS

SM Consoles | Modern Ergonomic Design

Our R&D department designs the consoles according to user ergonomic needs to ensure the layout and dimension requirements.

Our Production department manufactures SM Consoles by using sheet metal to enforce durability.

Telmek's SM Consoles can offer maximum visual sightlines.

In the consoles', 12U Sliding 19" racks are also available which can make an advantage.

SMA Consoles | Adjustable Height

SMA consoles allow users to adjust the work surface height. This process could be done by using a button manually or with a remote controller. It is also possible to control this height with a mobile device using an application.

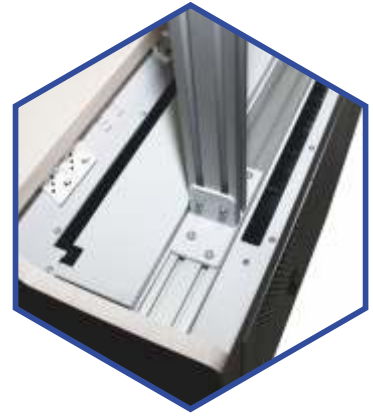

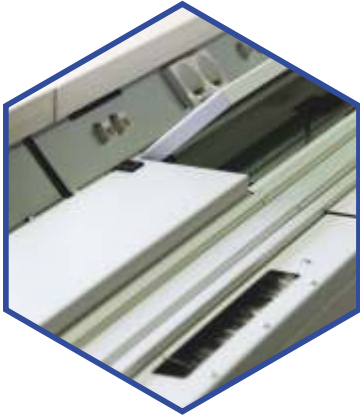

Both in SM and SMA Consoles, 12U Racks could slide back or front.

Again in both SM and SMA Consoles, perforated doors provide air circulation.

Accessories

Cable organising channel with cover on the back side of console not only provides easy and quick access to cables and also prevents clutter. This channeling also helps technicians to perform an easier installation and maintenance. Plug-socket, HDMI, USB and illumination options are available in the consoles.

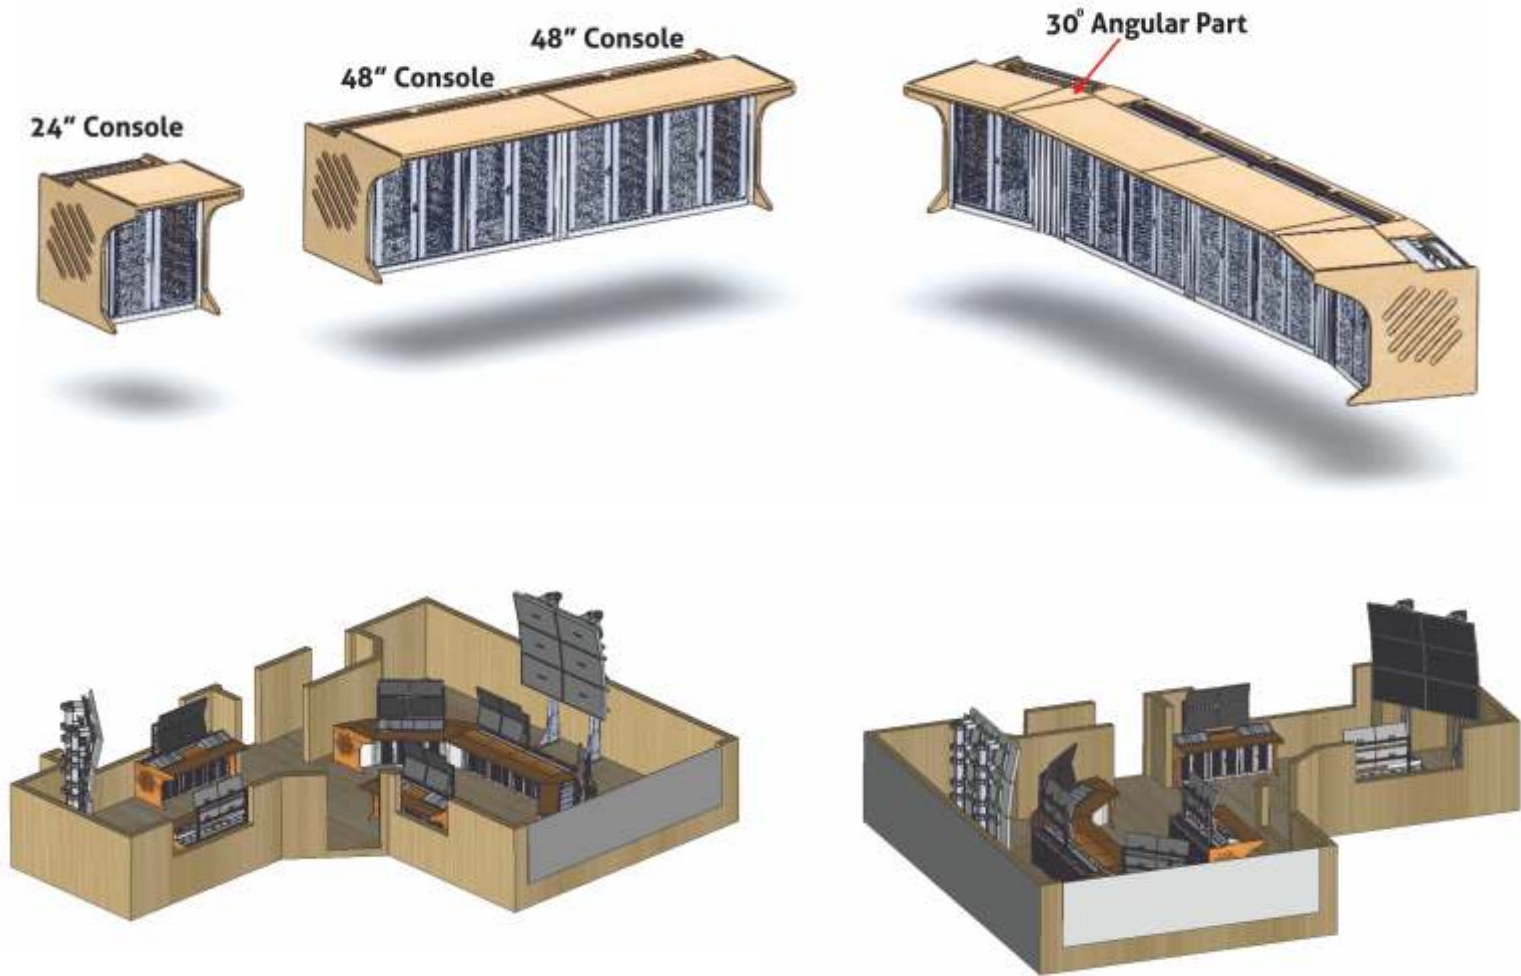

Rack Cabinets

19" rack cabinet systems are manufactured with supporting accessories which designed to meet today's and tomorrow's demands of the ongoing communication technology.

Modular & Flexible Equipment Settlement

Regarding to Customer Lay-Outs, Telmek can design and manufacture 24", 48", 72" 72" consoles and angular consoles with both single and multiple tier configurations.

Customized Limitless Products

Each console is designed and manufactured according to customers' technical specifications which includes brands of the electronics (Monitors, VCSS etc.) and dimensions of the items (handset, headset and etc.). Before the production, Telmek presents projects within a 2D/3D Technical Drawing. According to Customer decisions, Telmek can provide different kinds of material and color alternatives.
